

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, JQuery

Libraries and Frameworks: React, Material UI, Tailwind CSS, Next.js, Express.js

Tools & Platforms: Git, GitHub, Vercel, Render, Postman, Claude Code, Google Stitch

EXPERIENCE

Full Stack Web Developer (AI-assisted)

Boomerang Inc.

January 2026 - Present

Remote (Pampanga, Philippines)

- Leveraged Claude Code to accelerate full-stack development across MERN, Next.js, Supabase, and PostgreSQL
- Delivered key features and resolved critical bugs across finance, CRM, contracts, VAT, and procurement modules, improving platform stability and functionalities.
- Implemented an end-to-end UAE FTA-compliant VAT module and established QA processes, ensuring high code quality and 100% test pass rates on critical modules.

Full Stack Web Developer

Four13 Group LLC

September 2024 - October 2025

Remote (Minnesota, USA)

- Developed and maintained eCommerce platforms using BigCommerce, Next.js, and MongoDB
- Built reusable components and integrated APIs, improving page performance and user experience
- Collaborated with UI/UX designers, QA engineers, and project managers to ensure efficient development, testing, and deployment of features.

Junior Frontend Developer

IThinkWeb Corporation (now QualityTrade Asia)

March 2023 - September 2024

Pasig City, Philippines

- Worked closely with backend developers and UI/UX designers to revamp and successfully deliver the document management system, resulting in improved customer acquisition and user engagement based on internal reports.
- Effectively integrated over 100 APIs using RESTful architecture, facilitating seamless connectivity and functionality for enhanced user experience.
- Implemented user interfaces using frontend technologies including Material UI, SCSS, Reactstrap, React, and Next v12-13.

PROJECTS

Portfolio

- Personal website built with Next, React, Javascript, and TailwindCSS emphasizing my skills in web development and various projects.

Nimelist

- An anime website where users can browse trending and recommended titles, search for specific anime, view detailed information pages, and save favorites to a personal list.
- Implemented with Next.js 13, React, TypeScript, and Tailwind CSS, using the Kitsu Anime API to deliver dynamic and up-to-date anime data.

Quizap

- Developed a trivia quiz app with Next.js 15, TypeScript, Tailwind CSS, and Supabase featuring anonymous auth, point multipliers, and a real-time leaderboard.
- Leveraged Google Stitch for UI redesign with a responsive, mobile-first interface using React Context API, localStorage persistence, and TanStack React Query for data fetching.

EDUCATION

Polytechnic University of the Philippines

2019-2022

Graduated with a Diploma in Information and Communication Technology on October 28, 2022.
